# Gran Sabana North Route

The **Gran Sabana** is one of the oldest land formation on earth. During millions of years the table mountains have been formed. This classical tour takes us to the most beautiful places of the **Gran Sabana**. The way leads us to expansive savanna with table mountains in the background such as **Roraima, Kukenan**, Ptari tepuy and many others. We visit goldmines and breathtaking waterfalls. Our four wheel drive vehicle leads us safely up hill and down dale. We stay in little hotels in double rooms.

### Itinerary

#### Day 1. Ciudad Bolivar - Kamoiran

Early in the morning we start our tour in Ciudad Bolívar/Pto. Ordaz and make a short stop already in the Cachamay Park whose waterfalls "La Llovizna" give us a first impression of the beauty of the waterfalls in the Gran Sabana. We drive on and cross little villages like Upata, (founded in 1762 to protect the missionaries from hostile Indians), Guasipati, and El Callao where the biggest goldmine is located. After approx. 6 hours we reach Tumeremo. From Tumeremo we get via El Dorado to KM 88 and Las Claritas. Here the road winds up a 12 km long ascent called "La Escalera" until it reaches the plateau of the Gran Sabana. During this part of the trip we get to see the natural monument "Piedra La Virgen", the waterfall "El Danto", and the monument of the first "Soldado Pionero". From here we go on until we reach our little hotel situated at the rapids of Kamoiran. Double room/bath. ( - / L / D )
